

Blue Ocean Systems Infotech has won their first contract through GNFC. This is a 2 year engagement to provide SAP application support and continuous improvements program. This is an onsite and offsite engagement and involves an extended Solution Manager Implementation program as a part of the engagement.

### **About GNFC :**

Gujarat Narmada Valley Fertilizers Company Ltd. (GNFC), a 3500+ core company is a joint sector enterprise promoted by the Government of Gujarat and the Gujarat State Fertilizer Company ). It is set up in Bharuch, Gujarat since 1976 and is located at Bharuch in an extremely prosperous industrial belt.

It is one of the world's largest single-stream ammonia-urea fertilizer complexes. GNFC has successfully commissioned different projects - in fields as diverse as chemicals, fertilizers and electronics.

Since inception, GNFC has worked towards extensive growth as a corporation. A growth which respects the environment and springs from the progressive vision of GNFC.

GNFC today has extended its profile much beyond fertilizers through a process of horizontal integration. Chemicals/Petrochemicals, Energy Sector, Electronics/Telecommunications and Information Technology form ambitious and challenging additions to its corporate portfolio. GNFC has an enterprising, strategic view towards expansion and diversification.

### **What GNFC said :**

Blue Oceans Systems infotech was awarded this contract against leading multinationals, due to the interesting approach taken by them. We have taken this decision as we saw the value in their proposal. They have understood our requirements and we look forward to the partnership...Mr T H Diwan – Additional General Manager, ISD.
