

Get the business intelligence you need now to compete in a real-time world.

You can now make business decisions quickly and effectively, not just to compete in today's real-time world—but to succeed in tomorrow's. You can cut costs, budget strategically, forecast the next best step, all on the basis of key, up-to-the-instant figures.

Make your systems deliver the business intelligence you need right now, to plan for tomorrow's business success. And convert your highly paid, highly skilled staff into productive analysts who can counsel management on how to chart the business.

PowerOLAP® is a solution that leverages the tools and expertise you already possess.

Now that's intelligent.

Real-time analysis and ad hoc reporting using Excel or your Web browser.

Within the structure of your current systems is the information you need, unavailable through standard reports. ERP, CRM, Accounting, HR/Payroll, Manufacturing—these applications contain the information that is essential to run your business.

Now you can reach that data dynamically, with maximum capabilities to model data according to your changing business needs. And you will do so with the tools you use every day—Excel and your browser.

PowerOLAP provides dynamic on-line access to multiple sources, using the most common tools at your disposal. Data flows directly through PowerOLAP, so you continue to report using Excel, as well as incorporate all spreadsheet capabilities—calculation, formatting, graphing—in the solution. PowerOLAP combines advanced analytical and reporting capabilities with enhanced

- Dashboards, KPIs and Reports
- Predictive Analytics
- Multi-Company Consolidations
- Strategic Planning
- Budgeting and Forecasting
- Integrating External Data
- Maximizing Profitability

spreadsheet productivity. This is true online “Excel-Friendly” OLAP. And data can be accessed in real time through your browser, showing Web dashboards using graphics in the PowerOLAP Modeler or interactive visual analytics in Crystal Xcelsius™.

Dynamic budgeting and forecasting: planning for success.

PowerOLAP is an invaluable tool for budgeting, planning and forecasting. You can now build models and perform “what if” analyses on a solid foundation of current information. PowerOLAP creates bridges to future success, giving authorized staff interactive access to operational and profit plans as they are being developed.

Know what the business is doing right now—plan your best-case scenarios for success.

Now that's Intelligent Performance Management.

PowerOLAP integrates data dynamically from relational databases

Reach data from various transactional data sources, enabling you to budget, forecast, analyze and report using up-to-the-instant data. You now have the tools and the information to compete and succeed in the real-time business world.

Fast, flexible analysis, reporting and business modeling, across multiple dimensions.

Every day, you think in terms of multiple business dimensions: Products, Sales, Accounts, Regions, Periods, Actual vs Budget. Now you can create and re-create multidimensional views in PowerOLAP with drag-and-drop, double-click speed. See instantaneous results for your analyses, queries and "what if" scenarios as they reflect changing business conditions.

Dynamic access using Excel or the Web

With the click of a button, create a spreadsheet or dynamic Web view from PowerOLAP and work with the tools you know best. From Excel, it's simple to change a view and to perform higher-level analytical functions. Spreadsheets with dynamic access to underlying data sources are sharable throughout the enterprise or via the Internet. See changes in graphics in the PowerOLAP Modeler or Crystal Xcelsius.

And your spreadsheet or Web view will update automatically as the underlying data or structure changes.

This is true end-user empowerment!

Up-to-the-Instant Reporting

With PowerOLAP, you won't wait until well into the next month to create mission-critical month-end reports. Standard or ad hoc reports reflect data entries as they occur.

Reports, created from spreadsheets or the Web, are also dynamically linked to the data through PowerOLAP. When new data enters the database, the reports, graphs and all, are updated. Fast, accurately and automatically.

PowerOLAP delivers the knowledge you need to manage your business and to succeed.

Get all the information you need—now—to effectively operate your business:

- Advanced analysis, including "what if" and on-the-fly capabilities, using multidimensional data-modeling technology
- Powerful data access and ad-hoc reporting from Excel or across the Web
- Up-to-the-instant, real-time data from all of your critical organizational databases
- Enterprise-wide sharing—permitted users in the organization may read data wherever they are, through zero footprint connections and via the Internet
- Multi-user access to the same data, at the same time, across your organizational servers, ensuring one version for all
- Fortune 1000-class budgeting and forecasting that is cost-effective for all companies
