

SAP Business One and Industry 4.0

The SME Digital Platform for the 4th Industrial Revolution

The Digital Platform For SMEs

Enhanced by the Digital Enablers

SAP Business One Platform can set the stage for SME's Transformation to Industry 4.0

What is Industry 4.0?

From Wikipedia: The **Fourth Industrial Revolution** (or **Industry 4.0**) is the ongoing transformation of traditional manufacturing and industrial practices combined with the latest smart technology.

These technologies give your company the ability to change your business models, and create new products and services in the digital economy.

Why SAP Business One?

The digital solutions of SAP Business One are capable of revolutionizing the manufacturing processes of companies, by allowing greater autonomy in production through unified control stations. Customers can, for example, choose specifications and close orders over the internet, and data is sent directly to the machines, which receive and send information in real time to the system. This digital evolution makes the users have extremely positive experiences, receiving information anytime and from anywhere.

Competitive Advantage → Implement robust business process, adapt to market changes, and anticipate business trends

Connect Business Functions → Cross departmental collaboration within your organization

Easy Access to Data → Real-time data insights equate to making better business decisions
